

## North American Wind Research and Training Center Partners

**This project is supported** by the Governor of New Mexico, Bill Richardson; Secretary of New Mexico Energy, Minerals and Natural Resources Department, Ms. Joanna Prukop; Secretary of New Mexico Economic Development, Mr. Rick Homans; United States Senators, Pete Domenici and Jeff Bingaman; United States Representative Tom Udall; and New Mexico Representative Brian Moore.

**Mesalands Community College**, located in Tucumcari, New Mexico, is a two-year institution of higher education accredited by The Higher Learning Commission, a Commission of the North Central Association of Colleges and Schools. In an effort to preserve its history, the College places a strong emphasis on Applied Science in Technology degree offerings. The College also offers a university studies transfer degree. The College's primary service area

is vast, covering approximately 11,860 square miles of the state's 121,356 square miles. The College attracts students from all over the United States, as well as international students. Contact: Dr. Phillip O. Barry, (575) 461-4413 Ext. 108.

**Sandia National Laboratories** develops and applies advanced technology to keep our nation secure and capable of meeting the toughest challenges. Our "passion for our mission" has led to many major national security contributions over our 56-year history, and has also developed technology to improve our lives in a variety of ways. Sandia is seizing the opportunity to establish deeper, enduring relationships that produce world-class joint R&D, educate next generation employees, provide

Sandia employees with continuous learning opportunities, and build national visibility and name recognition. These objectives are achieved, in part, through partnership with selected institutions. We are funded primarily by the U.S. Dept. of Energy with other major funding by the Dept. of Homeland Security and Department of Defense, and are managed by the Lockheed Martin Corporation. We regularly partner with other government, industry, and academic institutions to accomplish our work.

**The Regional Development Corporation (RDC)** is a private, non-profit economic development corporation in north central New Mexico. RDC's work plan is leading to the development of an economically diverse regional economy where thoughtful and cooperative planning results in an environment that nurtures business and entrepreneurial development. For

this purpose, RDC assists communities and industry in managing their economic development projects and initiatives, including helping communities and organizations implement their clean energy initiatives. Contact: Mr. David Griscom, (505) 820-1226.

Continued

**The Coalition for Clean Affordable Energy (CCAIE)** is a tightly organized alliance of ten New Mexico consumer interest and environmental groups, which was founded in 1997. CCAIE researches and provides technical expertise on clean renewable energy policies for New Mexico, and focuses on outreach and education for policy and decision makers. CCAIE's member groups include the NM Citizens for Clean Air and Water, NM Public Interest Research Group, the NM Solar Energy Association, the Rio Grande Chapter of the Sierra Club, the SW Energy Efficiency Project, the SW Research and Info Center, Western

Resource Advocates, NRDC, the League of Women Voters, and the NM Community Action Network.  
Contact: Ms. Amy Welch, (505) 255-1090.

**The Greater Tucumcari Economic Development Corporation**

(GTEDC) is a private, non-profit economic development corporation in Quay County, New Mexico. GTEDC's effort is leading to the development of an economically diverse regional economy where strategic and cooperative planning results in an environment that assists business and entrepreneurial development. For this purpose,

GTEDC assists local communities and industry in managing their economic development projects and initiatives.
