Plans of Study: Associate of Arts

Business Administration

The Business Department at Mesalands Community College offers the Associate of Arts Degree with a General Business option. Associate of Arts Degrees are awarded to students who complete the degree plan requirements in our Business Administration programs.

GENERAL BUSINESS OPTION

The Business Administration program (General Business option) provides the means for students to acquire skills in accounting, business communications, business law, computers, economics, and management. These skills will enable students to enter the business world. This program is designed to provide the first two years of business courses for those students who plan to pursue a four-year degree. Graduates of the Business Administration program are exposed to a variety of disciplines through their course work, and are given the opportunity to improve and enhance their interpersonal, critical thinking and problem solving skills.

Education

The Education options provide a stimulating, challenging forum wherein scholars and practitioners interact in the discovery and mastery of the science and art of educational endeavors. This balanced approach, in which research and practice are viewed as essential and complementary, enables the College to produce superior educators.

BILINGUAL OPTION

The Bilingual option is an internationally significant field that crosses many disciplines. Students will be provided with opportunities to become teachers and educational leaders who work with children to develop a democratic and pluralistic society.

TOTAL CREDITS

Fine Arts

Contemporary artists need strong practical technical proficiency so they may convey conceptual ideas through visual material reality. The Fine Arts program emphasizes the important aesthetic correlation of appropriate media manipulation with manifestation of a desired affective outcome.

The program offers hands-on creative experiences with a variety of media applications to visual problem-solving including: bronze casting, fabrication with a variety of materials, carving, drawing and painting. An equal emphasis is placed upon student development of appropriate technical manipulation, individual creative initiative, and conceptual awareness and intent.

Bronze sculpture has a strong tradition in Mesalands' foundry. Other media options are also strongly pursued. Exploration in the combining of several media is encouraged.

COMMUNICATIONS OPTION

The Communications option provides opportunities for students to explore interests and develop proficiencies in general communications, writing, computer use, and publishing software while gaining a background in liberal arts studies. Graduates of the program complete course work that explores a variety of academic disciplines. Students who intend to use the Communications option as a basis for transfer should make certain that their course selection meets the requirements of the applicable degree at the college or university to which they plan to transfer.

LIBERAL ARTS CERTIFICATE

The Liberal Arts Certificate program is designed to provide students with the opportunity to explore areas of interest in the liberal arts. Graduates of the program will complete coursework that explores a variety of academic disciplines. Students must choose one or more courses from each area of study for a total of 21-23 credit hours. Students who intend to use the Liberal Arts Certificate option as a basis for transfer should make certain that their course selections meet the requirements of the applicable degree at the college or university to which they plan to transfer.

Natural Sciences

The Natural Sciences program at Mesalands Community College awards an Associate of Arts degree for students completing the degree plan requirements in either the Geology or Paleontology options.

GEOLOGY OPTION

The Earth has been important to the inhabitants of New Mexico from the beginning: early Native Americans collected chert to make arrowheads, the Spanish mined copper and gold, and Anglo settlers extracted silver and uranium.

The tradition continues. The field of geology continues to be an important component of the economy of New Mexico, from the oil companies of Roswell and Farmington to the copper mines of Silver City, the coal mines of Gallup, the potash mines of Carlsbad, to the hydrogeologists who try to find enough water for the major cities of the state. This program provides a primary education in the natural sciences. Students will be exposed to the fundamentals of geology, biology, and computer science. The geology program emphasizes practical knowledge through field trips and laboratory work. Courses take advantage of the rich natural resources of the mesa country of eastern New Mexico, a state-of-the-art, computer-interactive science laboratory. and the College's natural history museum, the Mesalands Dinosaur Museum.

FALL

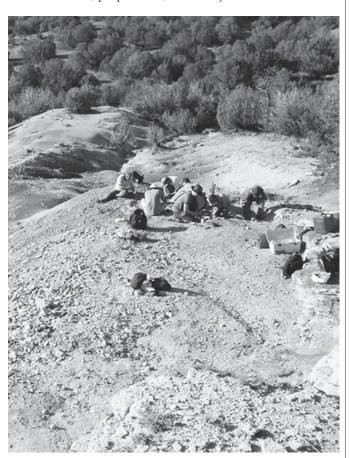

PALEONTOLOGY OPTION

Since Ice Age cave dwellers collected ancient sea shells and sharks' teeth, fossils have fascinated us all. The scientific study of fossils is about as old as this country. Fossils are now important sources of information in biology and geology.

New Mexico is blessed with a rich record of fossils. Many types and ages of fossils are present in this state, from dinosaur footprints to mammoth skeletons, and from mighty dinosaur skeletons to sea shells.

This program provides a primary education in the earth and biological sciences with an emphasis on paleontology. Students will be exposed to the fundamentals of geology, biology, and paleontology. The paleontology option emphasizes practical knowledge of fossils through field trips and laboratory work, including week-long summer classes where students can learn about excavating fossil vertebrates. Courses take advantage of the rich natural resources of the mesalands country of eastern New Mexico, a high technology science laboratory, and the College's paleontology museum, the Mesalands Dinosaur Museum.

The Paleontology option emphasizes fossils, particularly their collection, preparation, and study.

Physical Science

PRE-ENGINEERING OPTION

The Physical Science (pre-engineering) concentration offers students the opportunity to explore concepts in mathematics and science, and to develop written and verbal communication skills. Graduates of the program will be computer proficient and have well-developed critical thinking and problem-solving skills. This program is intended to prepare students for a baccalaureate program in engineering or the physical sciences. Students may want to consult with their adviser about specialized summer opportunities that may enhance their educational experience.

Pre-Medical Arts

PRE-DENTISTRY OPTION

The goals of a dentist are to care for and preserve natural teeth and periodontium, provide prosthetics when necessary, and educate people about oral health and hygiene to prevent tooth decay and periodontal disease. This degree program is designed to introduce students to the field of dentistry. The curriculum emphasizes fundamentals of science, math, social behavior and verbal and written communication skills.

PRE-VETERINARY OPTION

The goals of veterinary medicine are to practice preventive medicine to keep animals in good health, to diagnose and treat sick animals, and to counsel owners, community leaders and the public to maintain the public health. The Pre-veterinary Medicine curriculum follows a curriculum similar to that for pre-medicine. Emphasis is on courses in animal science, comparative vertebrate anatomy, animal physiology, and biochemistry. Handson or practical experience in a veterinary clinic is often desirable.
