About the *CPI*

Your career personality is the pattern of attitudes, values, and behaviors that represent the distinctive way that you approach career choices. Knowing your career personality can help you to determine what kinds of work suit you best.

The *Career Personality Inventory* can help you identify your career personality type and the core career and life themes associated with it. You can then use that information to plan for greater career success.

The *CPI* is not a test, and there are no right or wrong answers. Just follow the directions for each step and take your time.

When you are ready, open the booklet and begin with Step 1.
